PROFESSIONAL EXPERIENCE:

ITC InfoTech(Parent Company), Gurugram (November 2019 , till date)

Fidelity Investments (Client):

Fidelity Investments is a UK based company which provide asset management tools and solutions to individuals and advised customers.

I have been part of Adviser Work Station which offers fund management solutions to advisory firms which in turn supports individual clients.

This platform enables advisers to create fund models, manage its client's investment and provide reports.

I have been part of Client Reporting module which provides one stop solution to get all the information related to clients account in a pdf report format. It is a detailed report which contains funds and portfolio based details and actual projection of their investment.

In Upload and Send, adviser can upload various instructions in doc format which are required by regulatory body without having the need to use Royal UK mail service which was not available during the pandemic induced lockdown. Once uploaded in system, it allows advisor to track its status as well.

Roles and Responsibilities:

- Enhanced hybrid test Frameworks for event based automation using Kafka Listeners, rest assured, Cucumber and Java for automating the API using maven build tool.
- Attending daily Stand up Meetings (Client calls) involved in test estimations and completion.
- Delivering QA solutions and presenting the demo for the committed stories at the end of every sprint.
- Writing the Automation Script/test cases using RestAssured, Cucumber and Java.
- Utilized Jenkins, Git, and Eclipse for deployment on servers and to move towards CI/CD.

NIIT TECHNOLOGIES LTD, Greater Noida (July 2016 – May 2019)

Project: Simulated Environments Inc. (SEI):

SEI is a leading global provider of asset management, investment processing, and investment operations solutions for institutional and personal wealth management.

Roles and Responsibilities:

- Automating test cases using Java, Selenium and TestNG based on Business Requirements.
- Review automated scripts.
- Delivering QA for the committed stories at the end of every sprint.
- Involved in discussion on bugs posted in CA Rally and tracking them till closure.
- Utilized Jenkins, Git, and Eclipse for deployment on servers and to move towards CI/CD.
